PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience designing and deploying RESTful APIs, backend application development, and application support engineering. Skilled in Python, Flask, PostgreSQL, CRUD operations, JWT authentication, database schema design, and third-party API integration. Experienced in application troubleshooting, debugging, root cause analysis, and supporting Linux-based deployment environments. Strong foundation in object-oriented programming, data structures and algorithms, SDLC, and API testing using Postman. Familiar with Docker, Git, and production deployment workflows. Open to opportunities in Backend Engineering, API Development, Python Development, and Application Support Engineering.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JavaScript, HTML5, CSS3
- **API Development:** REST APIs, CRUD APIs, JSON APIs, JWT Authentication, OAuth2, Session Management, API Testing, API Documentation, OpenAPI / Swagger
- **Backend Technologies:** Flask, SQLAlchemy ORM, MVC Architecture, Jinja2, Server-side Rendering, Authentication Systems
- **Application Support:** Incident Management, Troubleshooting, Root Cause Analysis, Technical Assistance, Log Analysis, System Monitoring, Deployment Support
- **Databases:** PostgreSQL, SQLite, SQL Queries, Database Schema Design, Indexing, Relational Database Design, ORM
- **DevOps & Tools:** Linux, Git, GitHub, Postman, VS Code, Docker, Render, GitHub Pages, Cursor
- **Software Engineering:** OOP, Data Structures & Algorithms, SDLC, Debugging, Unit Testing, Version Control, Automation Scripting, Problem Solving
- **Other Skills:** Third-party API Integration, Backend Deployment, Production Configuration, Environment Variables, Agile Methodology

PROJECTS & TECHNICAL EXPERIENCE

- **Cafes with WiFi Finder** github.com/AbhishekV-python-dev
Python, Flask, REST APIs, PostgreSQL, SQLAlchemy, Google Maps API Jun 2024 – Sep 2024
 - Developed a Flask-based REST API backend with CRUD operations using SQLAlchemy ORM and PostgreSQL
 - Integrated Google Maps API for location-based cafe search and distance filtering
 - Designed relational database schema to improve query performance and data management
 - Deployed the application on Render with production configuration and environment variables
 - Tested API endpoints using Postman and validated HTTP requests and responses
- **Women's Self-Help Group (SHG) Empowerment Portal** github.com/AbhishekV-python-dev
Python, Flask, SQLAlchemy, SQLite, Bootstrap, Flask-Login Oct 2024 – Feb 2025
 - Developed a full-stack web platform enabling SHGs to manage products, buyer inquiries, loan applications, and government scheme updates
 - Implemented secure authentication and role-based access control using Flask-Login and SQLAlchemy ORM
 - Built CRUD modules for products, loans, schemes, trainings, and notifications with responsive Bootstrap UI
 - Designed admin dashboard for user verification, product approvals, and loan management workflows
- **Personal Portfolio Website** abhishekv-python-dev.github.io/Portfolio
HTML5, CSS3, JavaScript Jan 2025 – Feb 2025
 - Built a fully responsive portfolio website showcasing backend projects and technical skills with clean UI and interactive components
 - Deployed via GitHub Pages with Git-based version control and continuous iterative updates

EDUCATION

- **Nehru Institute of Technology** Coimbatore, Tamil Nadu, India
● *Bachelor of Engineering (B.E.) — Computer Science and Engineering | CGPA: 7.8 / 10 August 2020 – May 2024*

CERTIFICATIONS

- **100 Days of Code: The Complete Python Pro Bootcamp | Udemy:** Built 100+ Python projects covering Flask, REST APIs, automation, and data handling *Sep 2024*
- **Generative AI & LLM Engineering | Udemy:** Studied prompt engineering, transformer model architecture, and core LLM concepts *Mar 2025*
- **Python Data Structures & Algorithms + LeetCode Practice | Udemy:** Solved 150+ algorithmic coding problems: arrays, trees, graphs, dynamic programming *Jun 2025*
